KEY FEATURES

- Supports 802.11a/n/ac standard and 2×2 MIMO standard
- The highest transmission rate is 867 Mbps
- Outdoor recommended transmission distance: 0 ~ 15 km
- Integrated antenna, quick installation
- Built-in VTrans technology, including

  1) TDMA+: Eliminate the impact of performance degradation caused by hidden terminals and maximize wireless transmission efficiency

  2) Frequency (channel) extension function: Eliminate interference caused by the same frequency and adjacent frequencies through more frequency choices

  3) Channel width selection: By adjusting the channel width, the overlapped part of the spectrum can be avoided, and the influence of interference by other channels can be reduced

  4) Auto ACK function: Intelligently calculate the ACK value required for long-distance transmission to achieve the best performance at this distance

- Intelligent QoS wireless multimedia optimization technology, providing high priority transmission levels for voice and video
- Supports wireless spectrum scanning, can analyze the spectrogram of the set spectrum, can monitor the real-time energy information of the environment, including WIFI and non-WIFI energy
- Supports JTrans, it can reduce the external interference from the same frequency band of the equipment and accessories, so that the equipment can have better network stability in the environment of large interference
- Supports high-precision wireless link test function, compared with professional testers, test error ⩽3%
- Supports antenna calibration tool, real-time aligning the antenna
- Supports dual firmware backup. The mechanism can prevent the device from stopping work in extreme conditions
- Supports web page management, making installation and maintenance of equipment more convenient
- Supports wireless controller (AC) management, realize remote centralized configuration and upgrade management
- The digital tube displays the signal strength, which is convenient for debugging
- IP66

Wireless controller needs to be purchased separately

Protocol	802.11a/n/ac
Frequency	5745~5825 MHz (China) Frequency range: 4920MHz~5960MHz (should follow local laws and regulations when using)
Operating Mode	AP, Station
Security	WPA2-PSK, MAC Filtering, ACL configuration
Management	Supports Web/AC remote management
2.4G Wi-Fi Management	Supported

| Other	Supports VLAN, QoS, Equipment Alarm, Spectrum Scanning, Link Test, Watchdog

INSTALLATION

1. Wireless Transmission Device
2. POE Adaptor
3. Mounting brackets
4. The LAN port of POE adaptor can be connected with the other devices
5. The POE port of POE adaptor should connect to the POE port on the main device

*The actual installation height needs to be determined according to the transmission distance and the installation environment, and there is no obstruction between the two points.
